25. A BRIEF NOTE ON THE EFFECT OF COVID 19 PANDEMIC ON IMPARTING EDUCATION AND TRAINING

The Covid 19 Pandemic has brought out both positive and negative results in the academic arena. The faculty and students of PVPSIT are introduced to make use of updated technological methods in the teaching learning process. In this connection, physical classroom is replaced with Online classes. Initially, students suffered a lot to adapt to online classes due to lack of technical infrastructure and deprived social background. The lack of physical interaction between the teacher and the students results in distractions that lead to demotivation among some of the students. Consequently, there is a narrow decline in examination results.

The institution has taken concrete measures to overcome the above situation positively. The students have been counselled by class mentors as well as Head of the departments at regular intervals taking the help from parents. The Principal of the institution has been closely monitoring the situation during the Pandemic and taking timely measures to sustain and improve the academic harmony at PVPSIT. When the situation comes to normalcy, Lab sessions and examinations were conducted in offline mode. As the hybrid classroom has affected examination results, the institution plans to conduct classes in offline mode soon. The students and the staff were given possible instructions to safeguard their health. The vaccination drive was conducted for both faculty and students.
