The detailed syllabi for the B.Tech Second Year CSE (Data Science) program, tentative course structure for the third and fourth years, and the list of institutions setting end-semester examination papers were presented online.

- Approved the tentative course structure for the third and fourth years of the B.Tech-CSE (Data Science) Programme under PVP23 regulations.
- Ratified the of the list of institutions to prepare external question papers for the End Semester Examination.
- After reviewing the syllabi for Second Year B.Tech CSE (Data Science), the members of the Board of Studies (BOS) approved and finalized the course structures and syllabi, incorporating the following recommendations and modifications:

Modifications/Recommendations:

1. The following courses have overlapping content: Introduction to Data Science in II-1, Python Programming in II-1, Data Engineering in II-II, and Exploratory Data Analysis with Python. It is suggested to remove the redundant material and rearrange the topics accordingly.
2. It is recommended to include data wrangling concepts in the Introduction to Data Science course.

Resolutions:

1. Overlapping content has been removed from the following courses: Introduction to Data Science in II-1, Python Programming in II-1, Data Engineering in II-II, and Exploratory Data Analysis with Python. The concepts of Exploratory Data Analysis have been integrated into the Introduction to Data Science and Python Programming courses. Consequently, Full Stack Development - I has been moved from III-I to II-II, replacing Exploratory Data Analysis with Python.
2. Incorporated data wrangling concepts into Units 2 and 3 of the Introduction to Data Science course
