

Prasad V Potluri Siddhartha Institute of Technology

Internal Quality Assurance cell

A talk is arranged for all the faculty members of the institute on behalf of the IQAC and the Department of Mechanical Engineering.

Topic Name: **Agriculture latest innovations and Natural farming Products**

Speaker: ***Y. Chandrasekhar***, Chairman, EPL group

Date: 30/3/2024 (Saturday)

Time: 2.00PM

Location: Ground floor Seminar Hall

All faculty members are requested to attend without fail.

Highlights of the Talk:

The chairman of the EPL group ***Y. Chandrasekhar*** addressed the faculty and students of the institute on the importance of agricultural innovation and the role of engineering in bringing out new technology in the agricultural field.

As their company produces organic products and promotes traditional practices to enhance crop yield in the agricultural fields of Andhra Pradesh, the chairman shared the new methods and practices they are implementing to achieve higher organic yields from crop fields.

The talk also addressed the significance of organic honey, the purity of milk, and aqua products in our day-to-day lives.

In the presentation, the speaker highlighted the natural products and forming methodology, emphasizing their importance in agricultural practices. This demonstration encouraged engagement with farmers, fostering an interactive exchange to gather their valuable feedback.

By interacting, the audience gains insights into their experiences and perspectives, allowing for a better understanding of their needs and challenges. This feedback loop is essential for refining agricultural techniques, improving product development, and enhancing overall sustainability in farming practices.
