The Meeting took place at 2:00 PM on 05.10.2021 in online platform using Google Meet with link <https://meet.google.com/qrt-otpc-qvs>. The research scholar presented his proposal to work in the area of Antenna Design and expressed her interest to the Wearable Multiband Antenna for High Frequency Applications. The Members of the Doctoral Committee interacted with the scholar to assess his strength and weaknesses and to identify the topics for his course work as envisaged in the Ph.D. Regulations of the University. Based on the assessment, the committee, made the following recommendations.

1. The broad Area of Research of the Candidate: **Design and Analysis of Wearable antenna for WBAN Applications**
2. The Research Scholar is advised to take the following Course work:

Course Code	Title of the Course	Credits	Core Course/Elective
RME001	Research Methodology	4	Core
RPE17001	Research and Publication Ethics	2	Core
20ECC552J	Advanced Antenna Design Techniques	4	Core
20ECE555T	Radio Frequency System Design	4	Elective
20ECE587T	Wireless Sensors and Body Area Networks	4	Elective

3. The Research Scholar is further advised that he should complete the above recommended course work before December 2022.
4. The Comprehensive viva-voce examination for the candidate as per the Ph.D Regulations would be held after completing the course work, but before June 2023.

Dear Applicant,

You are provisionally selected for the admission in to Ph.D program in the faculty of EEE and you are requested to report at the office of the Director i/c, Admissions, JNTUA, Anantapur on 25.08.2011 (Thursday) at 10.30 am and submit the following at the time of admission:

- P.G. Degree certificate in Original
- Transfer certificate in Original
- Joining report of the candidate, countersigned by the research supervisor(s) indicating the place where the research work will be carried out.\*
- Migration certificate.
- A Demand Draft for ₹ 20,850 /- (₹ 20,000/- annual fee + ₹ 500/- Caution deposit + ₹ 200/- admissions fee + ₹ 150/- towards identity card ) drawn in favour of " The Registrar, JNTUA, Anantapur" payable at SBI, JNTUEC Branch, Anantapur (Code:2723)

Note: Regular JNTUA employees have to pay an amount of ₹ 200/- only towards the admission fee and submit a Service Certificate from their Head of the institution.

## Topic of research work of Mr. K. Venkata Rao

Engineering properties of fiber reinforced plastic (FRP) composites made of synthetic fibers are being determined using experimental techniques. As these fibers are man made, there is a control on size, shape and arrangement of fibers in the composites. Therefore the properties of the composites made of synthetic fibers can be easily determined.

Due to various advantages, now-a-days, FRP composites made of natural fibers are being explored. As these fibers are available in different geometric configuration, it is some what complex to estimate the properties of natural fiber composites. One of the ways to have control on the behaviour of the natural fiber reinforced composites is by predicting the properties of natural fibers. Finding the properties of fiber by taking the test specimen as the fiber may be difficult due to complexity in the geometry of natural fiber, however the properties of natural fibers can be obtained from the properties of composite made of natural fibers. For this purpose it is required to determine the properties of the composite lamina made of natural fibers.

Various ASTM standards are available to determine mechanical, thermal and electrical properties of natural fiber reinforced composites.

Properties of several natural fiber reinforced composites are available in the existing literature for some of the fibers like cotton, sisal, banana, kenaf, and jute etc...

There are many resources for exploring new natural fibers.

The process of predicting the properties of natural fiber reinforced composites is useful in two ways.

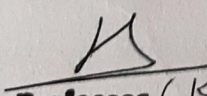

- (i) To determine the relative strength of various natural fiber composites.
- (ii) To utilize the experimental data to find the properties of fibers.

The proposed research work aims in identifying new composites made of various natural fibers and to test them for various engineering properties. So as to assess the best combination of the consistent materials for better strength and stiffness per unit weight of the composite and also to provide sufficient data to carryout analytical research to determine the properties of individual fibers.

### PLAN OF RESEARCH WORK

The proposed research work will be carried out as per the schedule given below.

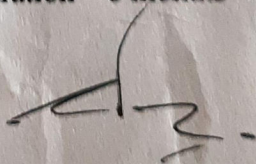

- i) Collection of relevant literature and identification of the problem – 6 months
- ii) Identifying the constituent materials - 6 months
- iii) Fabrication test specimens - 6 months
- iv) Testing of specimens - 6 months
- v) Interpretation of results and thesis report preparation – 6 months
