3	a)	Skim the passage given below and answer the following questions. Renewable energy sources like solar and wind power are increasingly critical for sustainable development globally. India, with its vast geographical diversity, has significant potential for harnessing these energies. Solar photovoltaic systems convert sunlight into electricity efficiently and are scalable for both residential and industrial use. Wind energy, harnessed through turbines, is another major renewable source complementing solar power. Adoption of such green technologies can mitigate climate change impacts by reducing dependence on fossil fuels. Governments worldwide, including India, are promoting policies to encourage renewable energy adoption. Technological advancements are	L3	CO2	5 M

The government's targets for renewable energy capacity additions are ambitious, aiming to contribute substantially to the nation's energy mix and reduce dependence on fossil fuels. Policies such as renewable purchase obligations for utilities and incentives for project developers have encouraged growth in this sector. Alongside opportunities, challenges persist regarding grid integration of intermittent renewable sources and the need for enhanced energy storage solutions. Technological advancements and cost reductions in solar and wind technologies are positive trends supporting adoption. Overall, India's renewable energy trajectory reflects a balance of policy push, technological progress, and environmental goals.

3.b. O.Henry, American writer, is famous for his short stories. His 'O.Henry Twist' is a famous literary plot device. At the end of "The Gift of the Magi", the twist reveals the ironic sacrifice made by both characters, Della and Jim. Della sells her long, beautiful hair to buy a platinum chain for Jim's prized pocket watch, while Jim sells his watch to buy ornamental combs for Della's hair. When they exchange gifts, each realizes that the present they have bought is now useless.

The unexpected ending highlights the story's central theme: true love lies in selfless sacrifice, not material value. The irony turns out to be a moral victory for the couple as their love and generosity outweigh the worth of any physical gift. Hence, the writer hails Jim and Della as the wisest gift-givers- "the Magi".

5. a. Alfred Tennyson's poem "The Brook," vividly presents nature through a variety of natural elements and living creatures, which help bring the brook to life and emphasize its continuous movement.

The poem describes natural elements such as the brook itself, which flows through valleys, hills, ridges and fields. It moves past ferns, willow-weed, lawns and forelands, rocks, pebbles, sand and banks, showing how the brook interacts with the earth as it flows. The journey of the brook, sometimes moving swiftly and sometimes gently, highlights the dynamic nature of the natural world.

Besides natural elements, the poet includes natural creatures to enrich the scene. The brook flows by hazel covers where foamy flakes gather and it passes fields and villages, suggesting harmony between nature and life. Creatures such as trout are mentioned, flashing in the water as the brook curves and glides. The birds, Coot, Hern, Swallows and insects are mentioned through the lively and musical movement of the brook. 5M

9.b. In "The Toys of Peace" by Saki (H. H. Munro), upbringing plays a decisive role in influencing a child's mindset, especially their attitude toward violence, imagination and values. The story sharply contrasts natural childhood instincts with the rigid influence of adult guidance.

The children in the story, Eric and Bertie are brought up by adults who strongly believe in peace, gentleness and anti-war ideals. The children are deliberately given peaceful toys instead of toys of war and violence. The intention of the elders is to cultivate a non-violent and socially responsible mindset in the children. However, Saki shows that upbringing does not always produce the intended results. Despite being provided with toys of peace, the children use their imagination to transform these objects into instruments of war. This suggests that children naturally respond to instinct, curiosity and imagination, which may override imposed moral lessons.

Thus, the story implies that an overly didactic and controlled upbringing can backfire. There may be ironic outcomes. The story illustrates that upbringing significantly influences children's mindset, but it should not be too restrictive or artificial.

10.b. Importance of introspection for students:

5M

- Introspection is vital in helping students manage academic pressure and stress effectively.
- By engaging in self-reflection, students become aware of their strengths, weaknesses and limitations.
- It enables them to identify the sources of stress, such as unrealistic expectations, poor time management or fear of failure.
- Introspection helps students set realistic goals and prioritize tasks as per their capabilities.
- It encourages decision-making, reduces pressure and promotes emotional balance and mental well-being and self-confidence.
- Self-introspection will lead to proper balance between academic responsibilities and personal life, ultimately leading to improved academic performance and reduced stress.
