Course Outcomes

Upon successful completion of the course, the student will be able to

CO1	Construct regular polygons, conic sections, curves and scales used in Engineering practice.
CO2	Construct orthographic projections of an object when its position is defined with respect to the reference planes.
CO3	Develop the orthographic projections for the given isometric view.
CO4	Develop the lateral surfaces of solids.
CO5	Identify the appropriate commands that are used to prepare the given drawing in CAD environment
